Naphthalene Superplasticizer (SNF) Process flow diagram

Raw materials for production
- Crude naphthalene (96%)
- Sulphuric acid (concentration 98%)
- Formaldehyde (concentration 36%)
- NaOH (40-60%)

Basic equipment for manufacturing
- Reactors
- Raw materials storage tank
- Pipeline
- Heating system
- Environmental protection equipment
- Additional equipment
- Automatic production monitored by computer system and data collection devices
